CommunityOne

a free and open developer conference

NEXT GENERATION WEB APPLICATIONS			PROJECTS AND STRATEGY			DATABASES	WEB & APP SERVERS		GLASSFISH	SCRIPTING AND RIAS		
NETBEANS		DEVELOPER PRODUCTIVITY: TOOLS				LINUX COMMUNITIES		OPENSOLARIS		CHIP MULTITHREADING		

MONDAY May 5, 08	Hall B&C	Gateway 102/103	Gateway 104	North Hall 121/122/124/125	Hall E 133	Hall E 134	Hall E 135	ESP 300	ESP 301	ESP 302	ESP 303	ESP 304/306	ESP 305	ESP 307-310	
9:30AM – 10:45AM	CommunityOne General Session with Ian Murdock, Vice President of Developer and Community Marketing, Sun Microsystems														
11:00AM to 12:00PM	Startup Camp	RedMonk Unconference	The NetBeans IDE: Welcome, New, and Cool	Open Source Tools for Optimizing Your Development Process	Advancing a Definition of Free Culture	Getting Started with OpenDS	The Road to Babel: Bringing JVM Machine Implementers Together	Breaking Down Barriers: Open Source Widgets, Mashups, and Web-Oriented Architecture for the Enterprise	OpenSolaris – New Features	Building a Web-Scale Open Source High-Performance Computing Stack	OpenSPARC: Welcome	OpenJDK™: Today and Into The Future With GNU/Linux	Startup Camp	Extending, Expanding, and Porting Mobile & Embedded Community Projects	GlassFish Application V2 and V3 Status and Roadmap
12:25PM to 1:20PM			NetBeans - Faster Than Ever	OpenOffice.org Extensions Development on the Java Platform with the NetBeans IDE in Practice	Lightning Talks: See Lots, Learn a Little	jMaki: The Power of Ajax Made Easy	Developing JavaFX Applications for the Enterprise	Building a Social Network with Liferay Portal	OpenSolaris Operating System and SAMP (Solaris Operating System Solaris OS, Apache, MySQL, PHP) Support for Web 2.0 Development	Project Darkstar	Multicore Processors and Microparallelism	An Introduction to Web 2.0 – Student	Ubuntu Community	Examining a sample Application built 3 different ways: Java EE, Spring 2.5 and Seam 2.0, deployed on Glassfish	(DB) Creative Programming with MySQL
1:30PM to 2:25PM			NetBeans for the Enterprise	Subversion 1.5: Great New Functionality for Developers	The IcedTea Project: Developing OpenJDK for Deployment on GNU/Linux	An Open SOA Platform, Open ESB: Composing Reusable Web Services	(SC) JRuby/JRuby Panel	Grails: Productive Web Development with Groovy, Spring, and Hibernate	Virtualization: xVM and VirtualBox	Developer Recipe for Multi-protocol Storage Server (AKA Roll Your Own NAS)	Techniques for Utilizing CMT	The Solaris Operating System (for people that do not know Solaris) Student	OpenSUSE Community	JavaFX Script Programming Language and GlassFish Application Server V3: Productivity and Power, Front to Back	(DB) Scaling MySQL
2:35 PM to 3:30 PM			Building Ajax Applications	Taking the Pulse of Eclipse-Based Plugins: How to Alleviate Tool Bloat and Compatibility Issues	Java User Groups: Think Globally, Act Locally	Creating the Developers of the Future	PHP, RIA Superhero	Integrating Social Software with Atom and Friends	OpenSolaris for Intel: Present and Future	Playing Nice with JavaScript Technology: Five Things You Should Know About DOM Design Patterns	Taking Multicore Chip Multithreading (CMT) to the Next Level of Throughput Performance with SMP, the Victoria Falls Processor	Open Sourcing Music: A Discussion of Applications for Creating and Managing Music	Fedora Community	Tools for GlassFish V3 (Java Platform, Enterprise Edition (Java EE Platform) and Scripting Environment)	My Database Is Slow! (postgresql talk)
4:00 PM to 4:55PM			NetBeans Platform Success Stories	What's New in the Apache HTTP 2.2 Server	TrackBot, Greenfoot, and Sun SPOT: Simulated and Physical Robots for Education from Upper Grade School to University Level	Maximize Application Performance on OpenSolaris and Linux operating systems using Sun Studio software	Asynchronous Ajax for Revolutionary Web Applications	OpenSSO Workshop: Creating Federated Relationships with Software as a Service, Social Networking, and Web 2.0 Applications	OpenSolaris and Storage	Amazon Web Services and OpenSolaris	OpenSPARC™ Technology in Hardware Reliability Research: Results and Future Possibilities	Operating System Community Panel	Startup Camp	GlassFish Lightning Talks	(DB) Streamlined Web Applications with MySQL Cluster and mod_ndb
5:05PM to 6:00PM			Lightning Talks: More cool stuff, toy show, partners, etc.	Transparent OSGi Integration with JBoss Microcontainer	Open Document Format (ODF) Workshop	Liberating Web Services	Python / Jython Panel	*** TOP SECRET ***	OpenSolaris Bring Your Own Laptop Hands-on Fest	Getting Started with the Grid Engine Hardware Open Source Project	OpenSolaris Operating System and Wireless Networking Advances	Open Source Java Testing Tools Projects (cQME, JT Harness, SigTest)	OpenMQ	(DB) Enabling Real-Time Rich Internet Applications with Java DB and Comet	
6:00PM to 7:30PM			Community Reception (@ BaseCamp in Hall A)
